

FOR 100K BUSINESSES

Why most businesses get stuck near 100k a year.

And the first place I look when a client is.

THE FIRST THING I CHECK

When a business is stuck near 100k a year, the first thing I look at is not the ad account.

I look at who keeps coming back.

TWO KINDS OF CUSTOMERS

Every business has two kinds of customers. One kind buys once and leaves. The other kind buys, comes back, buys again, and tells a friend.

ON DAY ONE, THEY LOOK THE SAME

You cannot tell them apart when they sign up or buy.

By day 30, one is paying for your growth. The other cost you money to get and never paid it back.

WHAT MAKES THE SECOND KIND STAY

- A better experience than the next tab over.
- More than one thing they can do with you.
- A real feeling of connection with the brand.

HOW TO TELL WHICH KIND YOU ARE ATTRACTING

Pull your last 300 customers.

Count the ones who bought a second time within 90 days.

If that number is under 15 in 100, you know where the leak is.

THIS IS NOT A CHANNEL PROBLEM

No email sequence will fix this on its own. No ad account will fix it on its own.

The fix sits one step before that, in who you attract in the first place.
