

FOR CREATIVE STRATEGISTS

A 5-minute competitor research move on the Meta Ads Library.

The five things to note on every winning ad.

STEP 1. FILTER FOR ACTIVE ADS

Open the Meta Ads Library. Search the brand. Filter by 'Last 90 days.' Sort by start date, descending.

Anything running now is what is winning now.

STEP 2. SPOT THE ADS THAT ARE SCALING

An ad running for 30 or more days across multiple regions is scaling.

An ad that ran three days and died is a test that failed. Skip it.

STEP 3. READ THE VARIANTS

A brand running four versions of the same ad is testing hooks.

The version still running after three weeks is the winner. Note it.

STEP 4. EXTRACT THE ANGLE

Look past the hook. What is the underlying argument? Identity. Problem. Mechanism. Outcome. Proof.

Hooks are disposable. Angles are reusable.

STEP 5. NOTE FIVE THINGS ON EVERY WINNER

- The hook angle.
- The mechanism promise.
- The proof element.
- The call-to-action style.
- The emotional frame.
