

FOR 100K BUSINESSES

5 mistakes that quietly kill margins near 100k.

And the one that costs the most.

MISTAKE 1. TREATING NEW BUYERS AND RETURNING BUYERS THE SAME.

A first-time buyer and a fifth-time buyer do not need the same email, the same ad, or the same offer.

When you send them the same thing, you pay full price to talk to the person who would buy anyway.

MISTAKE 2. RUNNING ONE OFFER FOR A YEAR.

One offer wears out faster than most owners think.

By month nine, the same ad costs more to run and brings in buyers who will not come back.

MISTAKE 3. FORGETTING THE SECOND PURCHASE.

**Most businesses build the first sale with care.
The second sale gets an afterthought.
The second sale is where the margin lives.**

MISTAKE 4. NOT KNOWING THE TOP 10 PERCENT OF BUYERS BY NAME.

The top ten buyers in a 100k business pay for most of the growth.

If you cannot list them from memory, you are undershipping to the people who would scale you.

MISTAKE 5. PAYING THE SAME PRICE TO REACH EVERYONE.

It costs more to talk to someone comparing four brands than to someone ready to stay with one for a year.

Most ad accounts pay the same for both.

THE ONE THAT COSTS THE MOST

Mistake 1. Treating everyone the same.

For the businesses I have worked with near 100k, fixing this one usually moves the number the most in the first 60 days.
