

FOR CREATIVE STRATEGISTS

How to niche down as a creative strategist.

The four filters that turn an industry into a real niche.

FILTER 1. REAL INTEREST

Name the five industries you have spent more than 20 hours reading about for fun. Not could have. Have.

If you cannot name five, niche picking is not the first problem.

FILTER 2. EVIDENCE THE MARKET IS SPENDING

Open the Meta Ads Library. Search three brand names in one of your industries.

If none of them have ads running for more than 30 days, the market is not spending on creative yet. Pick another.

FILTER 3. REACHABLE PROSPECTS

Can you name 20 real brands in the industry from memory right now. No Google.

If yes, the industry is reachable for you. If under 10, you do not yet know it well enough.

FILTER 4. ONE SPECIFIC PERSON

An industry is a category. A niche is a person inside it.

Example: a founder of a skincare brand between 500k and 2M a year who runs Meta ads and does not have a full-time creative lead.

THE NICHE SENTENCE

Put it all together.

'I help [specific person at specific stage] fix [specific problem] so they can [specific outcome].'

Paste it at the top of every outreach message this week.
