

POST-PURCHASE ONBOARDING

The 7 days that save 20% of churn.

Email by email.

Day 0: Identity

Not: 'Welcome to [Product].'

Yes: 'You just joined 8,000 marketers running [specific workflow]. Here's what happens in the next 7 days.'

Day 1: First win

One specific action that gets them a tangible result.

Not a tour. Not a checklist. One completed task.

Day 2: Proof

**A case study from a resident who's 3 months in.
Shows them what 'stayed' looks like.**

Day 3: Second use

A prompt to use the product for a different problem.

Second-use signal is the earliest predictor of retention.

Day 5: Obstacle check

'What's getting in the way?'

Not 'do you need help?' — that's passive. Ask a specific question.

Day 7: Habit anchor

Suggest a standing time to use the product (Tuesdays 10am).

Habits are what separate residents from tourists.

Tutorials leak.

Trust sequences compound.

Follow @muddassir for retention systems.
